	GLOBAL ECONOMICS **Grade: 10 - Learning Evidence 3** **DECISION-MAKING UNDER UNCERTAINTY-A** **Teacher: Nicolás López Cuéllar**	**1st TERM** **2026–2027**

Learning objective: Compare decision criteria and their limitations, and construct and interpret decision trees for staged filtering under uncertainty.	**Assessment criteria:** **C8**: Compares the Maximax, Maximin, Minimax Regret, and EMV/Bayes decision criteria by contrasting their information requirements, risk orientations, recommended alternatives, and limitations. **C9**: Constructs and interprets decision trees for staged filtering rules, applying decision criteria in the specified order to identify the final alternative. **C10**: Evaluates economic and financial decision-making scenarios by selecting and justifying the most appropriate decision criterion according to the information available, risk attitude, and decision context.

Name: _____ **Grade:** _____ **Date:** _____

1. Criteria assessment

This exam assesses C8 and C9, each worth 6 points. A **minimum of 4 points per criterion** is required to pass. Show all relevant calculations and justify your answers. Partial credit may be awarded for correct procedures despite arithmetic errors; answers without demonstrated procedures receive no credit. A 1-point penalty per criterion applies if the student's name is missing or the assessment is submitted late. C10 is assessed separately.

№	C8
1	3
2	3
Total	**6**

№	C9
3	2
4	2
5	2
Total	**6**

2. 1. Camera Rental Plans [C8-3]

A camera rental studio selects its inventory under uncertain demand. Profits are in thousand USD.

Alternative	High	Normal	Low
$P(S_j)$	0.3	0.5	0.2
Essential (A_1)	110	95	65
Shared (A_2)	150	160	35
Extensive (A_3)	250	52	-35
Modular (A_4)	180	135	-15

Decision statistics (Regret = maximum regret):

Alt.	Max	Min	Regret	EMV
A_1	110	65	140	93.5
A_2	160	35	100	132
A_3	250	-35	108	94
A_4	180	-15	80	118.5

Using the original camera rental payoffs, identify the alternative recommended by Maximax, Maximin, Minimax Regret, and EMV/Bayes, and report each criterion's deciding statistic value. **[1]** A subsidy s (integer, $0 \le s \le 95$) increases the low-demand payoffs of A_3 and A_4 by s. An alternative is eligible only if all its payoffs are nonnegative. Determine each camera rental plan's eligibility based on the value of s. **[0.5]** Among eligible camera rental plans, find the smallest allowed subsidy s at which the Maximin recommendation changes from A_1 to A_4 alone. Identify any tie at the threshold and distinguish it from a strict change. Respect the integer domain $0 \le s \le 95$; if no smallest value exists, state the threshold and the condition for a change. **[1.5]**

3. 2. Outdoor Cinema Refreshments [C8-3]

A cinema manager selects a refreshment kiosk under uncertain audience size. Profits are in hundred USD.

Alternative	High	Low
$P(S_j)$	0.35	0.65
Portable (C_1)	102	68
Full-service (C_2)	162	24
Deluxe (C_3)	190	-12
Fixed (C_4)	148	52

Decision statistics (Regret = maximum regret):

Alternative	Max	Min	Regret	EMV
C_1	102	68	88	79.9
C_2	162	24	44	72.3
C_3	190	-12	80	58.7
C_4	148	52	42	85.6

Using the original refreshment kiosk payoffs, identify the alternative recommended by Maximax, Maximin, Minimax Regret, and EMV/Bayes, and report each criterion's deciding statistic value. **[1]** A sponsor replaces C_1's large-audience payoff of 102 with g (integer, $102 \leq g \leq 170$). An alternative is eligible only if all its payoffs are at least 44. Determine each refreshment kiosk's eligibility based on the value of g. **[0.5]** Among eligible refreshment kiosks, find the smallest allowed sponsored payoff g at which the Minimax Regret recommendation changes from C_4 to C_1 alone. Recalculate regret benchmarks using only eligible kiosks. Identify any tie at the threshold and distinguish it from a strict change. Respect the integer domain $102 \leq g \leq 170$; if no smallest value exists, state the threshold and the condition for a change. **[1.5]**

4. 3. Garden Centre Stock [C9-2]

A garden centre selects a seedling stock plan D_1–D_6. Net profits are in hundred USD. The decision statistics are summarized below:

Alternative	Max	Min	Regret	EMV
D_1	159	71	66	134.8
D_2	181	49	44	150.2
D_3	137	93	88	121.6
D_4	203	27	66	150.2
D_5	115	71	110	99.6
D_6	225	5	88	150.2

Apply these stages in order: EMV/Bayes: Best 3. Maximax: Best 2. Maximin: Final selection. Illustrate each filtering stage, showing survivors and eliminations.

5. 4. Climbing Gym Expansion [C9-2]

A climbing gym selects an expansion plan F_1–F_6. Net profits are in thousand USD. The decision statistics are summarized below:

Alternative	Max	Min	Regret	EMV
F_1	178	52	45	130.3
F_2	142	88	81	122.2
F_3	160	70	63	138.4
F_4	223	7	81	116.8
F_5	124	79	99	106
F_6	196	34	54	123.1

Apply these stages in order: Minimax Regret: Best 5. EMV/Bayes: Best 4. Maximax: Best 2. Maximin: Final selection. Illustrate each filtering stage, showing survivors and eliminations.

6. 5. Art Materials Orders [C9-2]

An art materials distributor selects an order plan H_1–H_6. Net profits are in hundred USD. The decision statistics are summarized below:

Alternative	Max	Min	Regret	EMV
H_1	178	106	108	151.6
H_2	202	82	84	170.8
H_3	250	34	72	152.8
H_4	154	94	132	130
H_5	286	-2	108	144.4
H_6	226	58	60	162.4

Apply these stages in order: Maximin: Best 4. Minimax Regret: Best 3. Maximax: Best 2. EMV/Bayes: Final selection. Illustrate each filtering stage, showing survivors and eliminations.

7. C10: Separate activity reminder (unscored)

Complete the individual **Interactive Decision Webpage: C10 Practice** activity and submit the deployed webpage URL. See the separate activity for instructions.
