Overview

Grade 11 Term 3 is a LaTeX-based collection for teaching and assessing hypothesis testing. It progresses from designing hypotheses (criteria C1–C3), through one-sample proportion and mean tests and interpretation (C4–C7), to a web implementation and report using two-sample tests (C8–C10). The four top-level resource directories separate guided practice, learning evidence, catch-up work, and a longer worked exam. There are no HTML, CSS, or JavaScript implementations in this directory; the learning-evidence brief asks students to create and submit those files.

Audience labels below distinguish **student-facing**, **teacher/solution**, and **shared lesson** resources. LaTeX sources are printable lesson, assessment, or answer-key documents; CSV files are data resources rather than generated build outputs.

Directory tree

Reading the diagrams

The directory tree is divided into one landscape diagram per top-level directory so that every documented entry and description remains legible. Directory nodes use a dark fill; file nodes use a light fill, with descriptions shown in a secondary text color. The inventory root is ..

1-practice_activities/

1-practice_activities/

Shared lesson practice and reference material, mostly with worked solutions.

G11_T3_summary.tex Teacher/reference overview summarizing the intended progression and problem roles of the C1–C7 practice sequence.	r
G11_T3_MATERIAL.tex Shared lesson bank: twenty scaffolded hypothesis-test contexts spanning school, consumer, and economics topics.	r
G11_T3_L3_C7_practice_activity.tex Shared lesson: solved C7 minimum-sample-size problems with one-/two-tail and multi-alpha graphs.	e
G11_T3_L3_C6_practice_activity.tex Shared lesson: solved C6 cases on decisions, contextual conclusions, Type I/II errors, and policy implications.	N
G11_T3_L2_C5_practice_activity.tex Shared lesson: parallel solved C5 ladder for one-sample mean z-tests in count contexts.	
G11_T3_L2_C4_practice_activity.tex Shared lesson: solved C4 ladder for one-sample proportion z-tests, from basic cases to threshold/sample-size comparisons.	
G11_T3_L1_C1C2C3_practice_activity3.tex Shared lesson: six open-ended, locally framed C1–C3 problem-design prompts with solution guidance.	
G11_T3_L1_C1C2C3_practice_activity2.tex Shared lesson: eight solved C1–C3 tests emphasizing directional claims, changing alpha, and one- versus two-tailed comparisons.	
G11_T3_L1_C1C2C3_practice_activity1.tex Shared lesson: introductory C1–C3 activity with four solved contexts for parameters, hypotheses, and tail direction.	
G11_T3_L1_C1C2C3_practice_activity.tex Shared lesson: extended C1–C3 hypothesis-design practice with ten mean/proportion contexts and solutions.	

Repository

2 DIRECTORY TREE

2-learning_evidences/

4

2-learning_evidences/
Student assessments, answer keys, a web-project brief, and its candidate/example datasets.

G11_T3_L4_C8C9_example_proportion_data.csv	Example data: 20 student-level group labels and binary success outcomes.	
G11_T3_L4_C8C9_example_mean_data.csv	Example data: 12 paired columns of numeric observations for groups A and B.	
G11_T3_L4_C8C9C10_dataset_3.csv	Data: 24 time measurements for Baseline and New_Process groups (dataset G11_D3).	
G11_T3_L4_C8C9C10_dataset_2.csv	Data: 30 binary success outcomes for Method_A and Method_B (dataset G11_D2).	
G11_T3_L4_C8C9C10_dataset_1.csv	Data: 24 numeric scores for Control and Treatment groups (dataset G11_D1).	
G11_T3_L4_C8C9C10_activity.tex	Student-facing C8–C10 brief for an HTML/CSS/JavaScript two-sample-testing page and written report.	
G11_T3_L4_C10_dataset_3.csv	Data: 30 exercise-duration observations, 15 each for weekdays and weekends.	
G11_T3_L4_C10_dataset_2.csv	Data: 30 delivery-time observations, 15 each for FastShip and CityExpress.	
G11_T3_L4_C10_dataset_1.csv	Data: 30 study-hours observations, 15 each for groups A and B.	
G11_T3_L2_C4C5_exam_solutions.tex	Teacher material: concise five-problem C4–C5 key covering foundational, sensitivity, directional, and synthesis tests.	
G11_T3_L1_C6C7_exam_solution.tex	Teacher material: worked C6 decision/error cases and C7 minimum-sample-size cases in economic contexts.	
G11_T3_L1_C4C5_exam_student.tex	Student-facing C4–C5 assessment requiring four data-supported tests selected from six personal/local contexts.	
G11_T3_L1_C1C2C3_exam_student.tex	Student-facing C1–C3 assessment template requiring six balanced mean/proportion hypothesis designs.	
G11_T3_L1_C1C2C3_exam_solution.tex	Teacher material: model C1–C3 contexts plus guidance for six student-designed school-to-Bogotá problems.	
G11_T3_C1C7_midterm_solution_minimal.tex	Teacher material: condensed key for the same midterm, retaining calculations/graphs with less exposition.	
G11_T3_C1C7_midterm_solution.tex	Teacher material: full worked midterm key with explanations and plotted normal rejection regions.	
G11_T3_C1C7_midterm.tex	Student-facing midterm on a Grade 11 punctuality audit, assessing C1–C7 across two cohort benchmarks.	
G10_T3_L4_C10_dataset_3.csv	Data: 60 resale-value observations, split among Plan_A, Plan_B, and Plan_C.	
G10_T3_L4_C10_dataset_2.csv	Data: 60 weekly screen-time observations, split among Grade 10 STEM, arts, and sport groups.	
G10_T3_L4_C10_dataset_1.csv	Data: 60 delivery-time observations, split evenly among North_A, South_B, and East_C routes.	

Repository

File

3-catch_ups/

3-catch_ups/
Remedial or supplementary assessment material.

supplementary_homework.tex
Student-facing catch-up homework: a full C1–C7 hypothesis-design/decision task using two cohort benchmarks.

3-exams/

3-exams/

Expanded worked examination resources, separate from the learning-evidence folder.

G11_T3_L2_exam_solutions.tex

Teacher material: eight worked C4–C5 proportion/mean tests with graphs and contextual interpretation.

STRUCTURE.md is this inventory and is intentionally omitted from the tree.

Resource types and important relationships

- **LaTeX documents and shared configuration:** most practice and solution documents load `../../../../preamble/preamble` (some use a flexible `\input@path`); the C6–C7 solution instead loads `preamble.tex`. These shared preambles live outside Term 3 and supply document formatting and commands. Several standalone assessments declare their own packages rather than loading a shared preamble.
- **Images and generated graphics:** standalone assessment headers reference `../../../../preamble/logo.png`, also outside this tree. Files using `\IfFileExists` render a boxed “Logo” fallback, while three early learning evidence files reference the logo directly. Statistical diagrams are drawn from LaTeX/TikZ/PGFPlots code in the sources; no separate Term 3 image or media assets are stored here.
- **Practice progression:** the C1–C3 activities introduce parameters, hypotheses, and tail choice; the C4 and C5 ladders apply proportion and mean z-tests; C6 interprets decisions and errors; and C7 derives minimum sample sizes. `G11_T3_summary.tex` describes this sequence, although some filenames cited inside it use L1 where the present files use L2/L3 (see **Requires verification**).
- **Assessment variants:** the C1–C3 `exam_student` file is the blank student template and `exam_solution` adds model solutions/instructor guidance. The midterm has one student paper and two keys: a fully explained key and a deliberately shorter “minimal” key. The two Lesson 2 solution files are not duplicates: `2-learning_evidences/...exam_solutions.tex` is a concise five-problem set, while `3-exams/...exam_solutions.tex` expands coverage to eight worked C4–C5 problems.
- **Web, stylesheets, and JavaScript:** no `.html`, `.css`, or `.js` files are present. `G11_T3_L4_C8C9C10_activity.tex` is the specification that requires students to submit a main HTML file, linked stylesheet(s), JavaScript file(s), and a deployed-page link. It also links to external Git/GitHub Pages tutorials and three SharePoint datasets; those links are not local file dependencies.
- **Local datasets:** the activity brief does not name or programmatically load any local CSV. The `G11_T3_L4_C8C9C10_dataset_*` files nevertheless match its requested two-sample numerical/proportion work: score and time data support mean comparisons, while binary success data support a proportion comparison. The two `example_*` files provide smaller demonstration layouts. The three `G11_T3_L4_C10_dataset_*` files are additional two-group numeric datasets.
- **Downloadable documents and builds:** the directory contains editable `.tex` sources but no compiled PDFs or other downloadable binary documents. It also contains no build configuration, generated LaTeX auxiliaries, or dependency directories.

Requires verification

Verification status

- The three `G10_T3_L4_C10_dataset_*` files contain explicitly Grade 10 group names/data but are stored in Grade 11 Term 3. Their contents are clear, but whether their placement is intentional cannot be established from local references.
- `G11_T3_summary.tex` names C4–C7 practice files as Lesson 1 resources; the actual files are named Lesson 2 (C4/C5) and Lesson 3 (C6/C7). The summary’s conceptual descriptions match those files, but the stale naming should be confirmed before treating it as a literal dependency map.

Inventory scope

This inventory documents **32 pre-existing files** and **4 directories** below the Term 3 root. No transient or generated item was present to exclude. Per the requested policy, this newly created inventory is not counted or listed in its own tree.
