

- 1 (a) Write six thousand three hundred and twenty four in figures.

_____ [1]

- (b) Write the number 13 742 in words.

[1]

- 2 Here are some fractions.

$$\frac{1}{7} \quad \frac{1}{5} \quad \frac{1}{9} \quad \frac{1}{6}$$

Draw a ring around the **smallest** fraction.

[1]

- 3 Carlos collects information from children in his class to show the number of pets they have.

Here is the information.

Oliver 0 Carlos 1 Yuri 7

Mike 2 Rajiv 2 Hassan 4

Pierre 3 Ahmed 0 Chen 3

Complete the chart using the information.

number of pets	tally	frequency
0–2		
3–5		
6–8		

[2]

- 4 Here is a list of symbols.

= < >

Write one of the symbols in each box to complete each statement.

$$\begin{array}{ccc} -4 & \square & 3 \\ 9 & \square & -2 \end{array} \quad [1]$$

- 5 Here is part of a sequence.

$$\begin{array}{ccccc} & -5 & & -5 & \\ & \curvearrowright & & \curvearrowright & \\ 56, & 51, & 46 & \dots & \end{array}$$

The sequence continues in the same way.

Write the next two terms in the sequence.

_____ and _____ [1]

- 6 Draw a ring around the number that is divisible by 25

60 65 70 75 80

[1]

- 7 Jamila counts on from 16 in steps of 10

16 26 36 46

Write down any two numbers between 100 and 130 that Jamila says.

_____ and _____ [1]

- 8 Here is a rectangle.

Draw **all** the lines of symmetry on the rectangle.

Use a ruler. [1]

- 9 Mia wakes up at 7.00 am on Tuesday and gets ready for school.

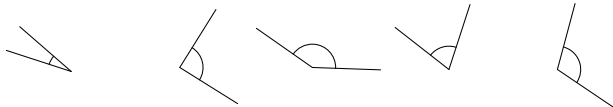

Draw a line to match each of the events to the correct likelihood.

event
she will be late for school
her teacher will change into an elephant
she will have a swimming lesson today
when she wakes up tomorrow it will be Wednesday

likelihood
it will happen
it will not happen
it might happen

[2]

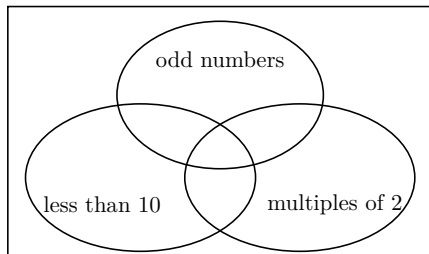

10 Here are some angles.

Draw a ring around **all** the acute angles. [1]

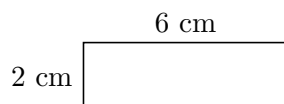

11 Here are some numbers.

1 4 5 8 12

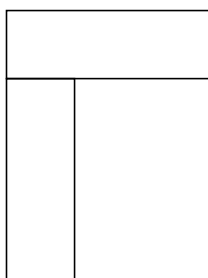

Write the numbers in the correct place on the Venn diagram. [2]

12 Here is a rectangle.

Two of these rectangles are joined to make a new shape.

Calculate the area of the new shape.

_____ cm² [1]

13 Six children share one pizza equally.

Draw a ring around the number statement which shows the fraction of pizza each child gets.

$$1 \div 6 = \frac{6}{1}$$

$$1 \div 6 = \frac{1}{6}$$

$$6 \div 1 = \frac{6}{1}$$

$$6 \div 1 = \frac{1}{6}$$

[1]

14 Aiko sorts some numbers into groups of odd numbers and even numbers.

odd numbers		even numbers	
253	567	450	976
134	761	852	654

Draw a ring around the number that is **not** in the correct place.

Explain how you know.

[1]

15 Here are some measurements.

time to run 50 metres

minutes

time of a football match

hours

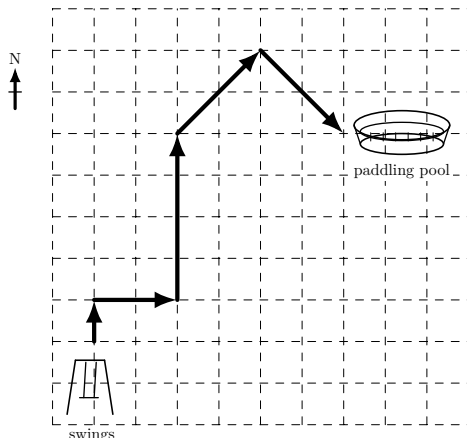

time of a whole school day

time taken to blink once

seconds

Draw a line to connect each measurement to the correct unit they would be measured in.
[2]

16 Here is the plan of a park on a grid of squares.

Eva walks on paths from the swings to the paddling pool.

The arrows show the direction Eva walks along each path.

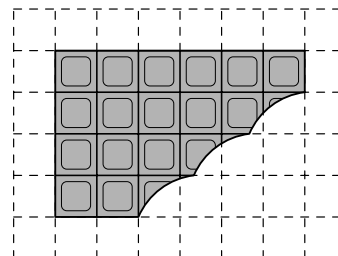

Complete the direction Eva walks along each path.

The first one has been done for you.

direction Eva walks along each path
north

[1]

17 Darius eats some of a chocolate bar.
The remainder of the chocolate bar is shown on a grid of centimetre squares.

Estimate the area of the remainder of the chocolate bar.

_____ cm² [1]

18 Arun leaves for a school trip on Monday at 8.00 am.
He returns in the same week on Friday at 5.00 pm.

Calculate the total number of hours for Arun's trip.

_____ hours [1]

19 Here is a list of symbols.

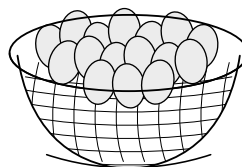

= > <

Write one of the symbols in each box to complete each statement.

$\frac{8}{15}$ $\frac{3}{5}$
 $\frac{8}{20}$ $\frac{4}{10}$

[1]

20 Rajiv collects 82 eggs.

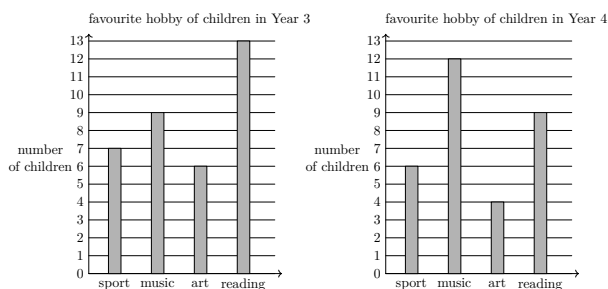

He puts the eggs in boxes.
Each box contains six eggs.

Calculate the number of **full** boxes of eggs Rajiv has.

_____ boxes [1]

- 21** Naomi wants to know about the favourite hobby of children in Year 3 and Year 4. She collects this data from children in Year 3 and Year 4.

The bar charts show her results.

Naomi says,

‘More children have music as a favourite hobby than reading.’

Naomi is not correct.

Explain why she is not correct.

[1]

- 22** Here are some fractions.

$$\frac{3}{14} \quad \frac{2}{9} \quad \frac{8}{14} \quad \frac{9}{15} \quad \frac{3}{21}$$

Draw a ring around the fraction that is equivalent to $\frac{1}{7}$. [1]

- 23** Here is a Carroll diagram.

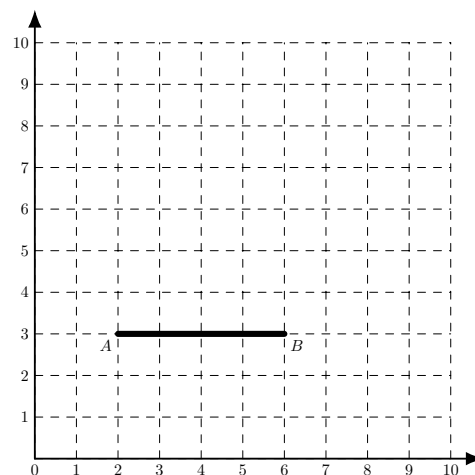

Some 2D shapes have been sorted on the diagram.

		not
.....	 	 
not	 	 

Complete the headings for the Carroll diagram. [2]

- 24** Here is a coordinate grid.

There is a line drawn on the grid from point A to point B .

Write the coordinates of point C and point D so that the points A , B , C and D can be joined to make a square.

(_____, _____) and (_____, _____)

[1]
