

1 Complete the sentence.

The value of the digit 3 in 3451 is _____ [1]

2 Draw a ring around all the multiples of 2.

889 120 465 351

[1]

3 Write a number in each box to complete the sentences.

$$\frac{4}{5} + \frac{2}{5} = \begin{array}{|c|} \hline \square \\ \hline \square \\ \hline \end{array}$$

$$\frac{8}{10} - \frac{3}{10} = \begin{array}{|c|} \hline \square \\ \hline \square \\ \hline \end{array}$$

[2]

4 Draw a ring around all the 2D shapes with a perimeter of 8 cm.

[1]

5 Here is a rectangle drawn on a grid of squares.

296 Draw the reflection of the rectangle in the mirror line. [1]

6 Write the number that can be expressed as

$$90\,000 + 2\,000 + 500 + 40 + 6$$

_____ [1]

7 Here are the spatial patterns for some square numbers.

first square number	second square number	third square number	fourth square number
•	•• ••		•••• •••• •••• ••••

Draw the spatial pattern for the third square number. [1]

8 Calculate.

$$83 \times 100 \quad \underline{\hspace{2cm}}$$

$$52\,300 \div 100 \quad \underline{\hspace{2cm}}$$

[1]

9 Here are some 2D shapes and 3D objects.

Each 2D shape folds to make one of the 3D objects.

Draw a line to match each 2D shape to the 3D object it folds to make. [1]

10 (a) Calculate.

$$453 - 134$$

_____ [1]

(b) An aeroplane flies from London to Dubai and then flies from Dubai to Sydney.

420 passengers get on an empty plane in London.

96 passengers get off the plane in Dubai.

52 new passengers get on the plane in Dubai.

Calculate the number of passengers on the plane when it arrives in Sydney.

_____ passengers [1]

11 (a) Calculate.

$$453 - 134$$

_____ [1]

(b) An aeroplane flies from London to Dubai and then flies from Dubai to Sydney.

420 passengers get on an empty plane in London.

96 passengers get off the plane in Dubai.

52 new passengers get on the plane in Dubai.

Calculate the number of passengers on the plane when it arrives in Sydney.

_____ passengers [1]

12 Safia investigates the question.

Are the oldest children in my school also the tallest children in my school?

Write the **two sets** of data Safia needs to collect to answer her question.

.....
.....

[1]

13 Draw a line to match the digital time to the equivalent time of day.

digital time

time of day

20:55

13:50

09:56

ten minutes to two in the morning

five minutes to nine in the evening

[1]

- 14** Eva has a measuring jug with a capacity of 1000 ml.

She pours some water into the jug.
The jug is now **three quarters** full.

Draw a line on the jug to show the level of the water. [1]

- 15** Here is a part of a sequence.

13 15 17 19

The sequence continues in the same way.

Draw a ring around **all** the numbers which appear in the sequence.

51 36 74 83 37

[1]

- 16** Here is a table of fractions.

	equivalent to $\frac{1}{5}$	not equivalent to $\frac{1}{5}$
$\frac{2}{10}$		
$\frac{3}{12}$		
$\frac{4}{15}$		
$\frac{5}{25}$		

Tick (✓) to show if each fraction is equivalent to $\frac{1}{5}$ or is not equivalent to $\frac{1}{5}$. [1]

- 17** Lily chooses a number which rounds to 50 000 when rounded to the nearest 10 000.

Write a number Lily could choose.

_____ [1]

- 18** Here is a bus timetable showing the time of buses from the Town Centre to Ashdown.

Each bus journey takes the same amount of time.

Town Centre	12:15	13:30	15:45	15:52
West Town	12:26	13:41	15:56	16:03
Middleton	12:54	14:09	16:24	16:31
Ashdown	12:58	14:13	16:28	16:35

(a) Calculate the length of time for the bus journey from West Town to Ashdown.
Write the time in minutes.

_____ minutes [1]

(b) Blessy travels by bus from the Town Centre to Middleton.
She must be in Middleton by 16:30.

Write the time of the latest bus she can take from the town centre.

_____ [1]

- 19** Here are some numbers.

3 6 14 18 21

(a) Write the number which is not a multiple of 3.

_____ [1]

(b) Write the number which is not a factor of 42.

_____ [1]

20 Here is a bag of 28 sweets.

Calculate $\frac{3}{4}$ of the number of sweets in the bag.

_____ sweets [1]

21 Here are some fractions and percentages.

fraction	percentage
$\frac{1}{4}$	
$\frac{3}{4}$	1%
$\frac{1}{2}$	25%
$\frac{25}{100}$	50%
$\frac{1}{100}$	75%

Draw a line to match each fraction to the equivalent percentage. [2]

22 Priya sorts some 3D shapes on to a Carroll diagram.

	has rectangular faces	does not have rectangular faces
has triangular faces		
does not have triangular faces		

(a) Tick (✓) the section where Priya places the cuboid. [1]

(b) Sketch a shape that Priya could place in the shaded area.

23 Here is a rectangle drawn on a grid of squares. [1]

Draw a **square** with the same perimeter as the rectangle. [1]

24 The table shows the number of visitors to local parks on Friday and Saturday.

name of park	number of visitors on Friday	number of visitors on Saturday
Animal Park	562	421
Downtown Park	357	243
Cinema Park	653	322
Magical Park	248	352

Tick (✓) the box to show if the statement is true or false.

	true	false
More people visit Animal Park than Cinema Park on Friday.		
Both Downtown Park and Magical Park have the same total number of visitors on Friday and Saturday.		
Animal Park has the greatest total number of visitors.		
Cinema Park was the least popular park on Saturday.
