	GLOBAL ECONOMICS **Grade: 10 - Learning Evidence 3** **DECISION-MAKING UNDER UNCERTAINTY-B** **Teacher: Nicolás López Cuéllar**	**1st TERM** **2026–2027**

Learning objective: Compare decision criteria and their limitations, and construct and interpret decision trees for staged filtering under uncertainty.	**Assessment criteria:** **C8**: Compares the Maximax, Maximin, Minimax Regret, and EMV/Bayes decision criteria by contrasting their information requirements, risk orientations, recommended alternatives, and limitations. **C9**: Constructs and interprets decision trees for staged filtering rules, applying decision criteria in the specified order to identify the final alternative. **C10**: Evaluates economic and financial decision-making scenarios by selecting and justifying the most appropriate decision criterion according to the information available, risk attitude, and decision context.

Name: _____ **Grade:** _____ **Date:** _____

1. Criteria assessment

This exam assesses C8 and C9, each worth 6 points. A **minimum of 4 points per criterion** is required to pass. Show all relevant calculations and justify your answers. Partial credit may be awarded for correct procedures despite arithmetic errors; answers without demonstrated procedures receive no credit. A 1-point penalty per criterion applies if the student's name is missing or the assessment is submitted late. C10 is assessed separately.

№	C8
1	3
2	3
Total	**6**

№	C9
3	2
4	2
5	2
Total	**6**

2. 1. Camera Rental Plans [C8-3]

A camera rental studio selects its inventory under uncertain demand. Profits are in thousand USD.

Alternative	High	Normal	Low
$P(S_j)$	0.25	0.5	0.25
Essential (A_1)	105	92	68
Shared (A_2)	145	155	38
Extensive (A_3)	245	50	-45
Modular (A_4)	175	132	-25

Decision statistics (Regret = maximum regret):

Alt.	Max	Min	Regret	EMV
A_1	105	68	140	89.25
A_2	155	38	100	123.25
A_3	245	-45	113	75
A_4	175	-25	93	103.5

Using the original camera rental payoffs, identify the alternative recommended by Maximax, Maximin, Minimax Regret, and EMV/Bayes, and report each criterion's deciding statistic value. **[1]** A subsidy s (integer, $0 \le s \le 105$) increases the low-demand payoffs of A_3 and A_4 by s. An alternative is eligible only if all its payoffs are nonnegative. Determine each camera rental plan's eligibility based on the value of s. **[0.5]** Among eligible camera rental plans, find the smallest allowed subsidy s at which the Maximin recommendation changes from A_1 to A_4 alone. Identify any tie at the threshold and distinguish it from a strict change. Respect the integer domain $0 \le s \le 105$; if no smallest value exists, state the threshold and the condition for a change. **[1.5]**

3. 2. Outdoor Cinema Refreshments [C8-3]

A cinema manager selects a refreshment kiosk under uncertain audience size. Profits are in hundred USD.

Alternative	High	Low
$P(S_j)$	0.45	0.55
Portable (C_1)	98	66
Full-service (C_2)	160	22
Deluxe (C_3)	186	-14
Fixed (C_4)	144	50

Decision statistics (Regret = maximum regret):

Alternative	Max	Min	Regret	EMV
C_1	98	66	88	80.4
C_2	160	22	44	84.1
C_3	186	-14	80	76
C_4	144	50	42	92.3

Using the original refreshment kiosk payoffs, identify the alternative recommended by Maximax, Maximin, Minimax Regret, and EMV/Bayes, and report each criterion's deciding statistic value. **[1]** A sponsor replaces C_1's large-audience payoff of 98 with g (integer, $98 \leq g \leq 164$). An alternative is eligible only if all its payoffs are at least 42. Determine each refreshment kiosk's eligibility based on the value of g. **[0.5]** Among eligible refreshment kiosks, find the smallest allowed sponsored payoff g at which the Minimax Regret recommendation changes from C_4 to C_1 alone. Recalculate regret benchmarks using only eligible kiosks. Identify any tie at the threshold and distinguish it from a strict change. Respect the integer domain $98 \leq g \leq 164$; if no smallest value exists, state the threshold and the condition for a change. **[1.5]**

4. 3. Garden Centre Stock [C9-2]

A garden centre selects a seedling stock plan D_1–D_6. Net profits are in hundred USD. The decision statistics are summarized below:

Alternative	Max	Min	Regret	EMV
D_1	138	66	54	118.2
D_2	156	48	36	130.8
D_3	120	84	72	107.4
D_4	174	30	54	130.8
D_5	102	66	90	89.4
D_6	192	12	72	130.8

Apply these stages in order: EMV/Bayes: Best 3. Maximax: Best 2. Maximin: Final selection. Illustrate each filtering stage, showing survivors and eliminations.

5. 4. Climbing Gym Expansion [C9-2]

A climbing gym selects an expansion plan F_1–F_6. Net profits are in thousand USD. The decision statistics are summarized below:

Alternative	Max	Min	Regret	EMV
F_1	225	57	60	161.4
F_2	177	105	108	150.6
F_3	201	81	84	172.2
F_4	285	-3	108	143.4
F_5	153	93	132	129
F_6	249	33	72	151.8

Apply these stages in order: Minimax Regret: Best 5. EMV/Bayes: Best 4. Maximax: Best 2. Maximin: Final selection. Illustrate each filtering stage, showing survivors and eliminations.

6. 5. Art Materials Orders [C9-2]

An art materials distributor selects an order plan H_1–H_6. Net profits are in hundred USD. The decision statistics are summarized below:

Alternative	Max	Min	Regret	EMV
H_1	168	102	99	143.8
H_2	190	80	77	161.4
H_3	234	36	66	144.9
H_4	146	91	121	124
H_5	267	3	99	137.2
H_6	212	58	55	153.7

Apply these stages in order: Maximin: Best 4. Minimax Regret: Best 3. Maximax: Best 2. EMV/Bayes: Final selection. Illustrate each filtering stage, showing survivors and eliminations.

7. C10: Separate activity reminder (unscored)

Complete the individual **Interactive Decision Webpage: C10 Practice** activity and submit the deployed webpage URL. See the separate activity for instructions.
