

C1: OPPORTUNITIES AROUND US

Entrepreneurship and Innovation Grade 10

Grade: _____
Date: _____
Name 1: _____
Name 2: _____
Name 3: _____

Our Goal

Innovation begins by noticing something that could be improved. First, you will generate ideas from your classroom experience. Then, as homework, you will observe your environment and identify situations that may represent a need, problem, discomfort, or opportunity for improvement.

At this stage, do not design a solution. Your goal is to identify situations worth investigating.

In-Class Activity: Generate Ideas

Think about your experience at school and in the classroom. Consider situations that:

- Make an activity difficult or inefficient.
- Cause discomfort or frustration.
- Waste time, materials, or resources.
- Create difficulties for students, teachers, or others.
- Could be organized or improved.
- Could be done differently.

Ideas from our classroom:

1. _____
2. _____
3. _____
4. _____

Observe Your Environment

During your normal day, pay attention to your surroundings. You may observe:

- Your school
- Your home
- Your neighborhood
- Public spaces
- Transportation
- Stores or businesses
- Recreational spaces
- Situations involving technology
- Other community environments.

Look for situations in which people experience a difficulty, need, discomfort, inefficiency, or unmet opportunity.

Do not start by asking: *“What should I build?”*

Instead, ask: *“What is happening, and what could be improved?”*

What to Record

For each opportunity, record:

Element	What to write	Example
Location	Where?	School cafeteria
Situation	What is happening?	Students wait in a long line.
Need / Problem / Discomfort	What needs improvement?	Students spend time waiting.
Who is affected?	Who experiences it?	Students and cafeteria staff.
Evidence	What did you observe?	The line became very long.
Why does it matter?	Why is it worth investigating?	Students have less time to eat.
Possible solution	Do you already have one?	Leave open for now.

Important: First understand the situation. Do not decide on the solution too early.

Opportunity 1

Location	
Situation	
Need / Problem / Discomfort	
Who is affected?	
Evidence	
Why does it matter?	
Possible solution	

Opportunity 2

Location	
Situation	
Need / Problem / Discomfort	
Who is affected?	
Evidence	
Why does it matter?	
Possible solution	

Opportunity 3

Location	
Situation	
Need / Problem / Discomfort	
Who is affected?	
Evidence	
Why does it matter?	
Possible solution	

Opportunity 4

Location	
Situation	
Need / Problem / Discomfort	
Who is affected?	
Evidence	
Why does it matter?	
Possible solution	

Opportunity 5

Location	
Situation	
Need / Problem / Discomfort	
Who is affected?	
Evidence	
Why does it matter?	
Possible solution	

Opportunity 6

Location	
Situation	
Need / Problem / Discomfort	
Who is affected?	
Evidence	
Why does it matter?	
Possible solution	

Initial Reflection

1. Which opportunity seems most interesting to investigate? Why?

2. What evidence makes you think this is a real situation rather than an assumption?

3. Who could help you understand this situation better?

4. What would you still need to find out?

Final Check

- ☐ I identified situations from my real environment.
- ☐ I described what I actually observed.
- ☐ I identified who is affected.
- ☐ I included evidence rather than only opinions.
- ☐ I explained why the situation could matter.
- ☐ I did not assume a final solution too early.

First understand the situation. Then understand the people.
