

Standard Normal Table Reference Sheet

How to read the table.

Let $Z \sim N(0, 1)$. The cumulative distribution function is

$$\Phi(z) = P(Z < z)$$

The table gives the area to the left of a positive z -value under the standard normal curve. The left column gives the first decimal part of z . The top row gives the second decimal part of z .

Example: For $\Phi(1.23) = P(Z < 1.23) = 0.8907$

Look for row 1.2 and column 0.03

$$f(x) = \frac{1}{\sqrt{2\pi}} e^{-x^2/2}$$

Standard normal table (values of $\Phi(z)$)

Useful identities.

$$P(Z > z) = 1 - \Phi(z)$$

$$\Phi(-z) = 1 - \Phi(z)$$

$$P(a < Z < b) = \Phi(b) - \Phi(a)$$

$$P(Z < -a \text{ or } Z > a) = 2(1 - \Phi(a))$$
