

#	Answer	Marks	Part Marks	Guidance												
1(a)	6324	1														
1(b)	Thirteen thousand, seven hundred and forty two	1		Accept recognisable misspellings.												
2	$\frac{1}{7}$ $\frac{1}{5}$ $\left(\frac{1}{9}\right)$ $\frac{1}{6}$	1		Accept any clear indication.												
3	<table><tr><td>number of pets</td><td>tally</td><td>frequency</td></tr><tr><td>0–2</td><td> </td><td>5</td></tr><tr><td>3–5</td><td> </td><td>3</td></tr><tr><td>6–8</td><td> </td><td>1</td></tr></table>	number of pets	tally	frequency	0–2		5	3–5		3	6–8		1	2	Award 1 mark for any four or more boxes completed correctly.	Do not accept five lines for five in the tally column, e.g.
number of pets	tally	frequency														
0–2		5														
3–5		3														
6–8		1														
4	-4 $<$ 3 9 $>$ -2	1		Both answers correct for the mark.												
5	41 and 36	1		Both answers correct for the mark.												
6	60 65 70 $\left(75\right)$ 80	1		Accept any clear indication.												
7	Any two from 106, 116, 126	1		Both answers correct for the mark.												
8		1		Both lines drawn as shown. Accept slight inaccuracies as long as intention is clear.												
9	<table><tr><th>event</th><th>likelihood</th></tr><tr><td>she will be late for school</td><td>it will happen</td></tr><tr><td>her teacher will change into an elephant</td><td>it will not happen</td></tr><tr><td>she will have a swimming lesson today</td><td>it might happen</td></tr><tr><td>when she wakes up tomorrow it will be Wednesday</td><td></td></tr></table>	event	likelihood	she will be late for school	it will happen	her teacher will change into an elephant	it will not happen	she will have a swimming lesson today	it might happen	when she wakes up tomorrow it will be Wednesday		2	Award 1 mark for any two or three correct lines.	Accept any clear indication.		
event	likelihood															
she will be late for school	it will happen															
her teacher will change into an elephant	it will not happen															
she will have a swimming lesson today	it might happen															
when she wakes up tomorrow it will be Wednesday																
10		1		Both answers correct for the mark. Accept any clear indication.												
11		2	Award 1 mark for any three or four correctly placed with no numbers repeated.													
12	24 (cm ²)	1														
13	$1 \div 6 = 6$ $\left(1 \div 6 = \frac{1}{6}\right)$ $6 \div 1 = 6$ $6 \div 1 = \frac{1}{6}$	1		Accept any clear indication.												
14	134 indicated with an explanation to show that 134 is not odd, e.g. it has an even digit in the ones place. or it can be divided exactly by 2 (so it is even)	1														
15	<table><tr><td>time to run 50 metres</td><td>minutes</td></tr><tr><td>time of a football match</td><td>hours</td></tr><tr><td>time of a whole school day</td><td>seconds</td></tr><tr><td>time taken to blink once</td><td></td></tr></table>	time to run 50 metres	minutes	time of a football match	hours	time of a whole school day	seconds	time taken to blink once		2	Award 1 mark for any two or three correct lines.	Accept any clear indication.				
time to run 50 metres	minutes															
time of a football match	hours															
time of a whole school day	seconds															
time taken to blink once																
16	<table><tr><td>direction Eva walks along each path</td></tr><tr><td>north</td></tr><tr><td>east or E</td></tr><tr><td>north or N</td></tr><tr><td>northeast or NE</td></tr><tr><td>southeast or SE</td></tr></table>	direction Eva walks along each path	north	east or E	north or N	northeast or NE	southeast or SE	1		All four correct directions for the mark. Accept recognisable misspellings.						
direction Eva walks along each path																
north																
east or E																
north or N																
northeast or NE																
southeast or SE																
17	Accept answers in the range of 16–18 (cm ²) inclusive, e.g. 17 (cm ²)	1														
18	105 (hours)	1														
19	$\frac{8}{15}$ $<$ $\frac{3}{5}$ $\frac{8}{20}$ $=$ $\frac{4}{10}$	1		Both answers correct for the mark.												
20	13 (boxes)	1		Do not accept 13 r 4												
21	An explanation that states that the total number of children who chose music (as a favourite hobby) is 21 (9 + 12) and the total number of children who chose reading (as a favourite hobby) is 22 (13 + 9) (so Naomi is wrong). Accept there is one more child who chose reading than music. Accept any correct numerical comparison between 9 + 12 and 13 + 9. Do not accept any explanation without numerical evidence.	1														
22	$\frac{3}{14}$ $\frac{2}{9}$ $\frac{8}{14}$ $\frac{9}{15}$ $\left(\frac{3}{21}\right)$	1		Accept any clear indication.												
23	<table><tr><td></td><td>regular polygons</td><td>not regular polygons</td></tr><tr><td>four sided polygons</td><td> </td><td> </td></tr><tr><td>not four sided polygons</td><td> </td><td> </td></tr></table>		regular polygons	not regular polygons	four sided polygons			not four sided polygons			2	Award 1 mark for each correct pair of headings.	Accept the word ‘shapes’ instead of polygons. For the mark the pairs in rows or columns must use consistent terminology, e.g. do not accept regular polygons and not regular shapes.			
	regular polygons	not regular polygons														
four sided polygons																
not four sided polygons																
24	(2, 7) and (6, 7) 	1		Accept coordinates written on the grid. Do not accept points without coordinates on the grid.
